Professional Experience

- 2021 – Present **Tier I BrainsCAN Postdoctoral Fellow** Western University, CA
- Functional mapping of the cortico-striatal-cerebellar circuitry involved in the cognitive ability of forming temporal predictions during rhythmic and non-rhythmic sequences of events.
 - Development of individualized encoding models (that better account for inter-subject variability) to improve functional specificity in neuroimaging of the cognitive mapping of elementary components associated with human behaviour.

- 2015 – 2020 **Postdoctoral Researcher** Parietal Team – Inria Saclay, FR
- Development of the Individual Brain Charting (IBC) dataset, an open-access, multi-task fMRI-data initiative.
 - Development of an individual-functional-atlasing approach to link functional segregation of specialized brain regions to elementary mental functions, by leveraging the IBC dataset.
