## Research

### RESEARCH EXPERIENCE

2021 – Present *Postdoctoral Fellow*: (1) application of brain-atlasing techniques and musical tasks to chart the cortico-basal ganglia-cerebellar circuitry involved in the cognitive ability of forming temporal predictions during rhythmic and non-rhythmic sequences of events; (2) development of individualized encoding models, suitable to be used in an ensemble of fMRI datasets, that systematically account for inter-subject variability through integration of group-level parcels with individual data and using a hierarchical Bayesian parcellation scheme.

- 2015 – 2020 *Postdoctoral Researcher*: (1) development of a multimodal neuroimaging dataset for large-scale functional atlas and cognitive mapping of the human brain; (2) application of mega-analytic encoding models to fMRI data for brain atlas, namely for the improvement of functional specificity in neuroimaging relative to elementary cognitive components that modulate behavior.
- 2010 – 2014 *Graduate Researcher*: investigation of the neural correlates of musical creativity, using fMRI as neuroimaging technique and musical improvisation as model behavior.
- 2005 – 2006 *Undergraduate Research Assistant*: process and analysis of seismic data and maintenance of the IST seismic stations.
